EN 12841 : 2006 TYPE B

NLIFT2G

NLIFT2D

TECHNICAL SPECIFICATIONS

material	body in aluminum
weight	225 g
main dimension	193 mm
additional	overmolded ergonomic handles

USE

- On ropes certified according to EN564, EN892, EN1891 with diameter between 8mm-13mm (EN567 use);
- On ropes certified according to EN1891 with diameter between 10mm-13mm (EN12841 use).

DESCRIPTION

The rope clamps NLIFT are designed for rope ascents. The overmolded grip and the ergonomic upper part enhance comfort and power when puling with one or two hands. The two holes facilitate the connectors attachment, one for the lanyard and one for the ascending foot loop.
