

CERTIFICATION : EN 362 / REGULATION : 2016 / 425

NM24N

NM28N.O

NM28NET

DESCRIPTION

Range of connectors of different shapes and sizes. These connectors are made of corrosion resistant steel or of light alloy for weight gain. They are all fitted with an automatic gate and the locking is automatic too. The opening varies according to the type of component to connect and allows a safety locking.

USE

For works at height with vertical fall hazards : connecting element intended to connect components together to make a fall arrest system when connected to an anchor point.

TECHNICAL SPECIFICATIONS

REF.	Class	Locking	Opening	Static resistance	Material	Weight
NM24N	T	Auto	50 mm	23 kN	Steel	480 g
NM28N.O	T	Auto	60 mm	23 kN	Aluminum	415 g
NM28NET	T	Auto	60 mm	23 kN	Aluminum	510 g
