

RECYCLED

NEOFEU reveals its new **H2'O®** recycled full body harness.

The world of Personal Protective Equipment for working at height is undergoing a revolution, with a design made from recycled materials.

BEAUVALLON, April 3rd 2024 - NEOFEU, as French manufacturer of fall arrest solutions, is proud to announce the launch of its latest innovation: **H2'O®**. As the first French manufacturer to develop and manufacture a full body harness made from recycled webbing, NEOFEU is confirming its commitment to **eco-design**, environmental protection and its CSR policy.

NEOFEU's new **H2'O®** full body harness is manufactured with a **recycled webbing** made of **used plastic bottles**. This high-quality, durable webbing is **14% more resistant** than our standard

webbing. The thread for the seams and the back plate have also been selected from **recycled materials**. The H2'O® harness is equipped with automatic buckles with locking indicator, combining safety and efficiency. The harness is also easy to inspect with fall indicators visible on the leg straps. Identification is simplified with a pocket containing the harness identification, the periodic inspection date and the user's name.

The **H2'O®** harness is delivered in a **0 plastic box**, made from **recycled cardboard and 100% recyclable**.

«At NEOFEU, we are proud to introduce this revolutionary product, which combines innovation, durability and safety», says Kévin Badoil, Marketing Manager at NEOFEU. «Using recycled materials allows us to reduce our environmental impact by lowering our CO2 footprint. We are continuing to redefine new requirements in the protection of work at height»

For more information on NEOFEU's new product or to arrange an interview with a company representative, contact us at neofeu@neofeu.com or by telephone on +33 (0)4 78 48 75 33.

Availability

The H2'O® harness will be available in April in 3 sizes. To find out your price, please contact us or one of your nearest NEOFEU retailer.
